

Q Lookahead

T3A2 Part B | Alex Leybourne, Ben Ulcoq, Santiago Chamon 🍌🧬

The Problem

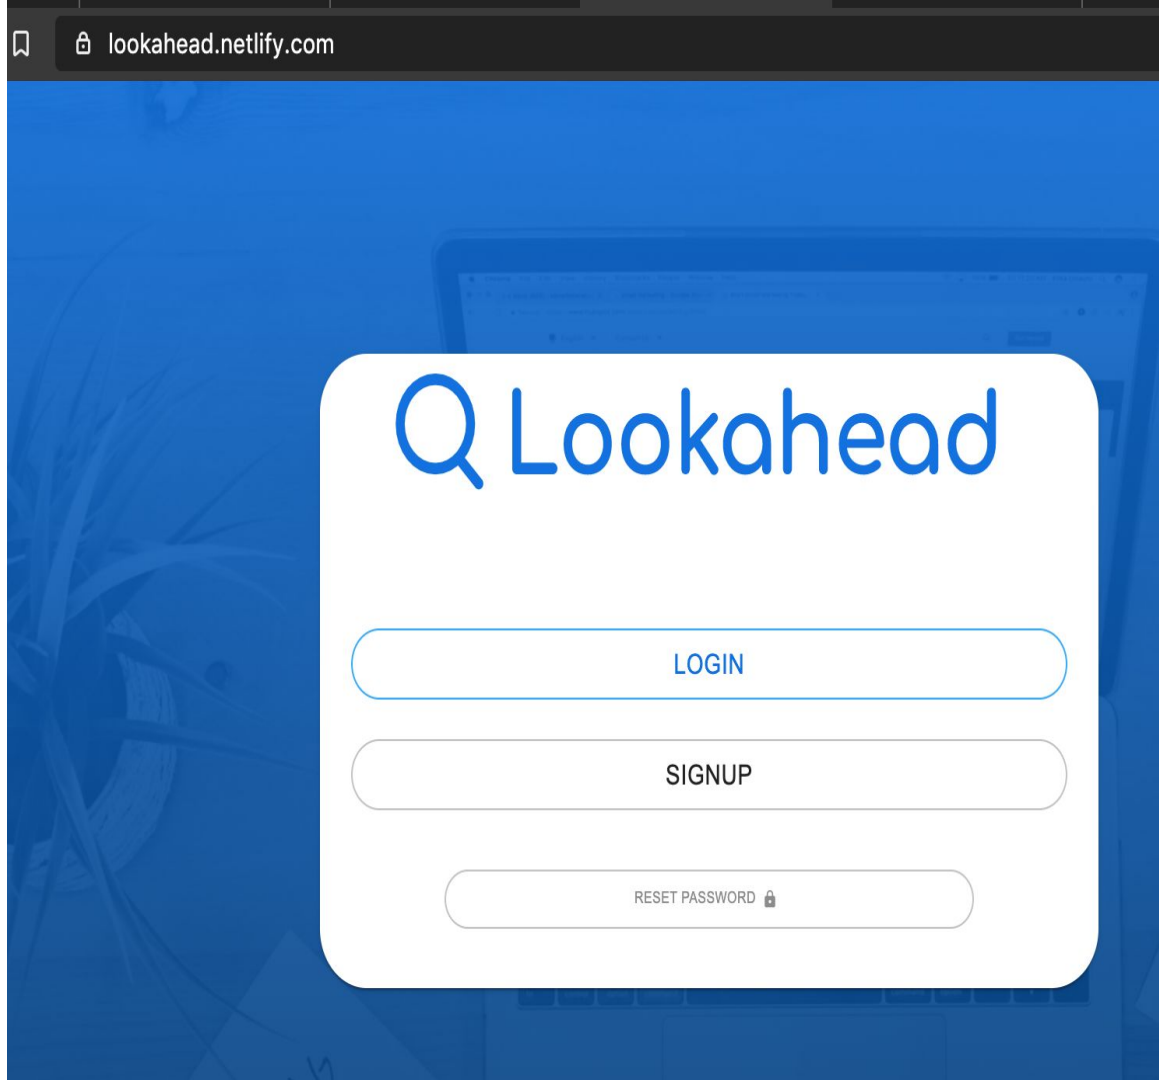

- Everyone in these construction sites needs to know what is happening next
- The market has a solution: spreadsheets
- This creates a massive opportunity for a modern application to take over the market

The Solution

- Luckily able to work with a client in these industries.
- The solution could be used around the world in massive projects
- Should be mobile-responsive, intuitive and easy to adapt

Features

- User Login/Signup
- Projects CRUD
- > Tasks CRUD
- > Add Users to Project
- >Project Task Click n' Drag & Drag
n' Drop

Extensible Features

- Assign roles to users
- Invite external users to the application
- Email/password reset from Login
- Categories for Tasks
- Importance levels for distinguishing critical Tasks

Challenges

- JWT Cookies
- Click and Drag/Drag and Drop
- Deploying with Cookies and Cors

- Spaghetti Code

Live Demo

The logo features a large, white, stylized letter 'Q' on the left. To its right, the word 'Lookahead' is written in a clean, white, sans-serif typeface. The entire logo is centered on a solid blue rectangular background. Faint, light-blue background graphics are visible, including a magnifying glass on the left and a document with the text 'THIS WEEK' on the right.
